Coding Club UC3M (https://codingclubuc3m.github.io/)

- **What?** Informal sessions among coding enthusiasts. Docendo discitur!
- **Why?**
  - We **like coding and keeping up-to-date**
  - We want to **exchange knowledge**
  - It is funnier to learn with more people than on your own!
- **Who?** Transversal. Professors, postdocs, PhD students, MSc students, etc.
- **When?** First ones given by the organizers:
  - "An introduction to the Julia language" (David García Heredia), 23/05/18
  - "A brief introduction to parallel computing in Julia" (David García Heredia), 06/06/18
  - "An introduction to Shiny as a teaching resource" (Antonio Elías Fernández), 19/06/18
  - "An introduction to Tensorflow" (Hoang Nguyen), 03/07/18
- Open to **contributors** next academic course!
  - **Topics**: teaching-related or research (maths, stats, optimization, presentation results). Whatever you think might be useful for others. Some suggestions of topics in the website
  - Online form
- Benefits of contributing:
  - Visibility
  - Proofreading and (soft)reviewing of the materials
  - **The most important: lots of fun!**
